

WEB PROJECT ON
“BOOKFLIX & CHILL”

SUBMITTED BY
MR. Pawan Mishra

THIRD YEAR BACHELOR OF SCIENCE
(COMPUTER SCIENCE)

UNDER THE GUIDANCE OF
MRS. SNEHLATA AGRAWAL

**ISMAIL YUSUF COLLEGE OF ARTS, SCIENCE AND
COMMERCE**

JOGESHWARI-(EAST) MUMBAI-400060

**Government of Maharashtra's
ISMAIL YUSUF COLLEGE**

Jogeshwari (East), Mumbai-400060

**DEPARTMENT OF COMPUTER SCIENCE
CERTIFICATE**

This is to certify that the project entitled
“Bookflix & Chill”

is completed by Mr. Pawan Mishra

(Seat No: _____)

Under the guidance of
Mrs. Snehlata Agrawal

In partial fulfilment for the Degree of Bachelor of Science
(Computer Science) of University of Mumbai

Prof.Incharge

Head

External Examiner

ACKNOWLEDGEMENT

The project of “Bookflix & Chill” has been a unique experience for me. I am very thankful to the **Department of Computer Science of the Government of Maharashtra’s Ismail Yusuf College**, which gave me the opportunity to take on this project.

I express my gratitude to our Head of Department **Prof. Nitin D. Shelke** and my project guide **Mrs. Snehlata Agrawal** for her invaluable support and guidance during the course of the project.

I am also very much thankful to the “UNIVERSITY OF MUMBAI” for including the project work as part of the syllabus, without which I would not have gained the experience of developing software as this.

Last but not the least, I would like to express my gratitude to my Friends for their support and guidance throughout this venture.

Thanking You

INTRODUCTION/ PRELIMINARY INVESTIGATION

● ORGANISATIONAL OVERVIEW

The main objective of the project is to create an online book store that allows users to search and purchase a book based on title, author and subject. The selected books are displayed in a tabular format and the user can order their books online through credit card payment. The Administrator will have additional functionalities when compared to the common user.

DESCRIPTION OF THE EXISTING SYSTEM

Previously people have to go shop by shop to search and buy the books, which is really time consuming and very difficult to get your favourite book.

People had to wait for long time to get the new launched book. Its had take many days for books to come in peoples near by store. People was facing problems to get their favourite authors books.

Existing System:

- ✓ The Records are maintained manually in registers for old students
- ✓ Peoples have to search for books store by store
- ✓ I.e. its very time consuming
- ✓ If there is any popular book launched recently it's very hard to get it.
- ✓ The owner has to manually keep updating information by entering the details in the logbook.
- ✓ Chance of human errors and manipulation.

DESCRIPTION OF THE PROPOSED SYSTEM

The main objective of the Bookflix & Chill is to manage the details of Books, Customers, Payments, Delivery, and Bills. It manages all the information about Books, Stock, Bills, and Books. The project is totally built at the administrative end and thus only the administrator is guaranteed access. The purpose of the project is to build an application program to reduce the manual work of managing Books, Customers, Stock, and Payment. It tracks all the details about the Payment, Delivery, and Bills.

Advantages:

- ✓ Very fast and accurate.
- ✓ Easy to use and understand.
- ✓ Secure.
- ✓ Easy Navigation.
- ✓ Time and Paperwork saving since it is automated.
- ✓ Reports can be generated at any time within a few seconds

Scope of the proposed system:

- To provide users to purchase books online.
- To add/delete users, and manage their accounts.
- To reduce users' searching time.
- To provide a wide collection of book ranges.
- To provide a user-friendly environment.
- To provide acknowledgment to the user.

FEASIBILITY STUDY

Depending on the result of the initial investigation the survey was expanded to a more detailed feasibility study.

Feasibility is the process of defining exactly **what is and what strategic issues need to be considered** to access its feasibility, **or likelihood of succeeding**. Feasibility studies are useful both when starting a new business and identifying a new opportunity for example for an existing business.

The feasibility study is a **test of a system proposal** according to its **workability and impact on the organisation**, ability to meet user needs and effective use of resources.

Technical Feasibility:

We can strongly say that it is technically feasible since there will not be much difficulty in getting required for the development and maintaining the system as well. All the resources needed for the development of software as well as the maintenance of the same are available in the organisation here we **are utilising the resources which are available already**.

Economical Feasibility:

The development of this application is highly economically feasible. The organisation needed **not to spend much money on the development of the system already available**. The only thing to be done in making an environment for development is to be done is making an environment for development with effective supervision. If we are doing we can attain the maximum usability of the corresponding resources even after the development the organisation will not be in a condition to invest more in the organisation, therefore, the system is economically feasible.

REQUIREMENT SPECIFICATION

Software Requirements:

- Programming language/ Scripting languages used: Php, MySQL
- IDE used: Microsoft Visual Studio Code

Hardware requirement(Min):

- Hard disk: 40 GB
- RAM: 1GB
- Processor Speed: 3.00GHz
- Processor: Pentium IV Processor and above.

Client Side Scripting:

- HTML
- CSS
- JavaScript

Server Side Scripting: **PHP**

Back-End Tool:

Back-end: MySQL

Testing Server: Apache

Other Software Used:

- Canva
- Xampp Server

Data Requirements:

- Insert /Update/Deletion the data in the application manually
- Import from the existing system.

Operating system compatibility:

- MS Windows: Windows 7 and above.
- Linux: Ubuntu 16.04 and above, etc.

SYSTEM DESIGN DETAILS

FACT FINDING TECHNIQUES

What is Fact Finding?

Fact Finding is the formal process of using research, interviews, questionnaires, and other techniques to collect information about systems, requirements, and preferences.

It is also called information gathering or data collection.

Who does it?

The System Analyst. The Analyst especially needs to develop a detective mentality to be able to discern relevant facts.

What is its Significance in SDLC?

Tools, such as data and process models, document facts, and conclusions are drawn from facts. If facts are not collected, tools can't be used effectively and efficiently.

When is it done?

System Development Life Cycle.

- System Analysis Phase
 - Study Phase
 - Definition Phase
 - Selection Phase
- Design
- Post Implementation Review

What are the facts to be collected?

Any information System can be examined in terms of four building blocks:

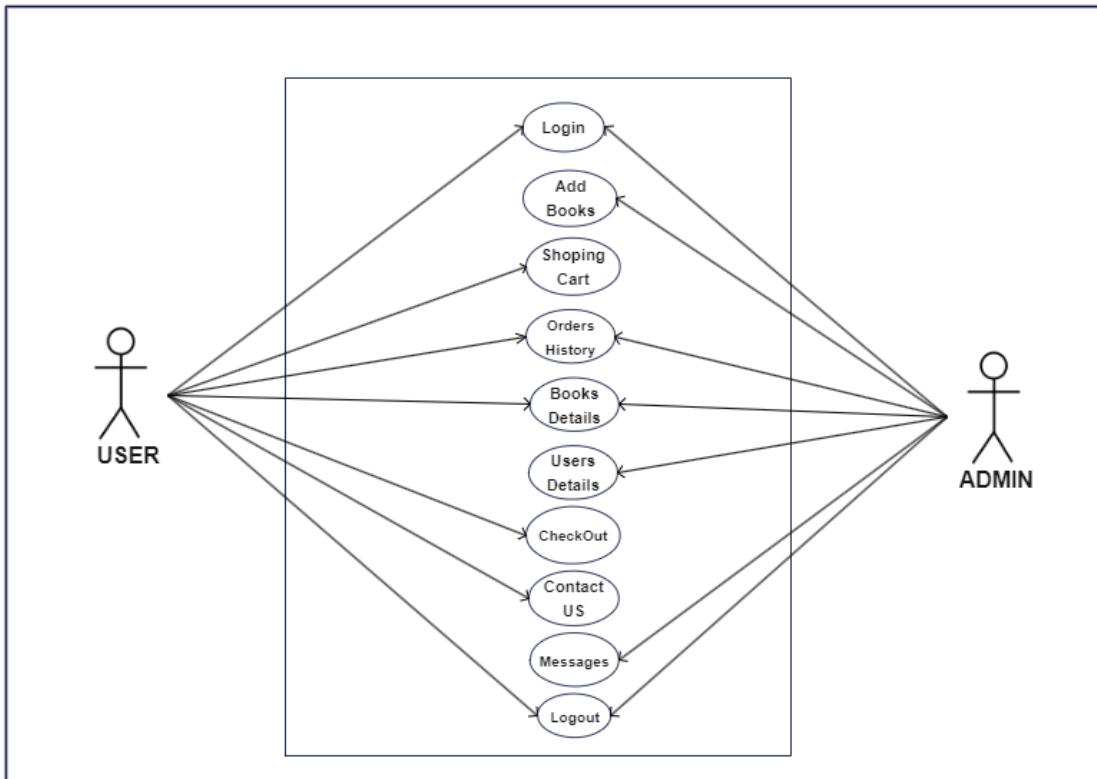

- Data: The raw material used to create useful info.
- Processes: The activities that carry out the mission.
- Interfaces: How the system interacts with people.
- Geography: Where data is stored, processes & interfaces happen

Fact Finding Techniques

There are seven fact-finding techniques:

1. Study & sampling of existing documentation, forms and databases.
2. Research and Site visits.
3. Observation of the work environment.
4. Questionnaires
5. Interviews
6. Joint Application Development (JAD)
7. Rapid Application Development (RAD) an Analyst usually applies several of these techniques during a single systems project.

USE-CASE DIAGRAM

DESCRIPTION OF USE-CASE DIAGRAM

Admin side use case diagram :

Its indicates that Admin can

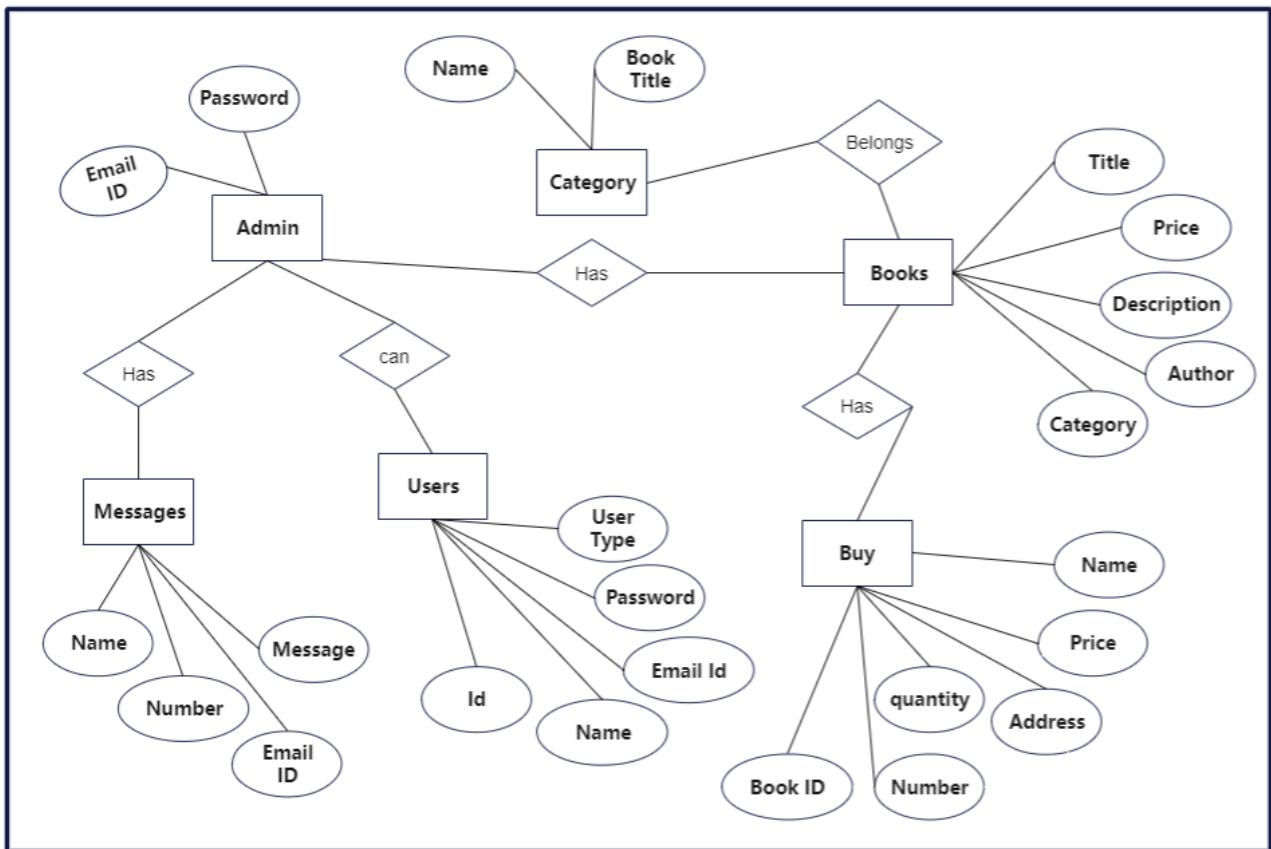

- Add, Edit, Delete Questions .
- Delete, Update Users Account.
- Generate Report / Activity Logs Of Users.

Users side use case diagram :

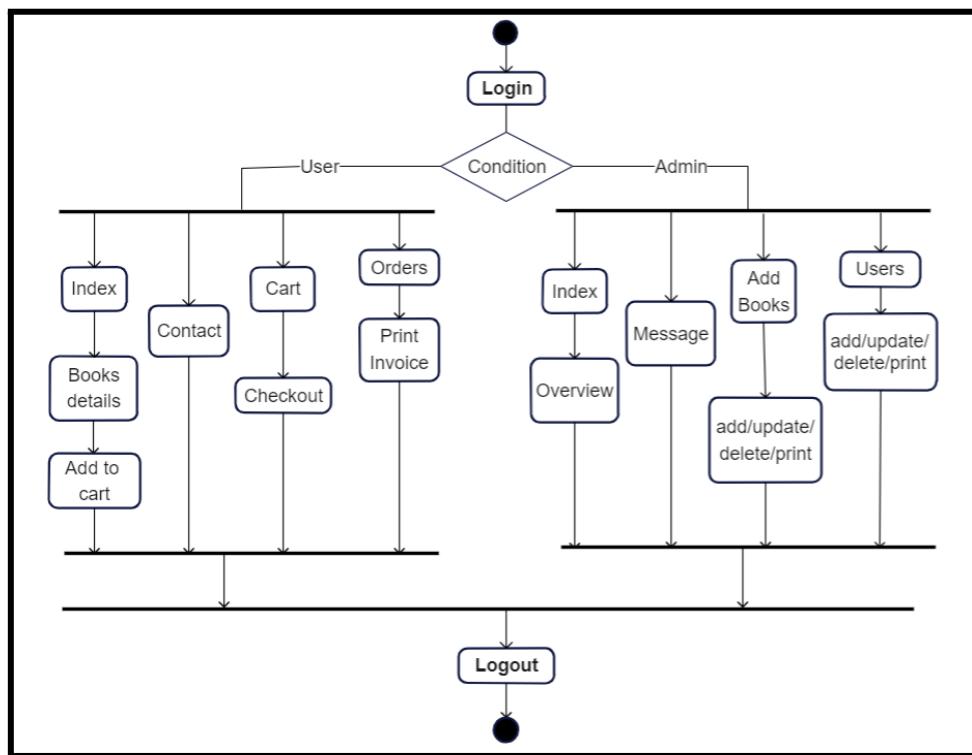

Its indicates that User can

- Add books to cart.
- Order the books.
- Generate the Invoice of the orders.
- Contact to admin.

PROGRAM DESCRIPTION

Bookflix & Chill

This program is designed to sell books online, to make it easy to search for a particular book and get all the books in the same place.

Working

Admin login-

- Admin will log in to the website by entering their particular email id and password.
- Then the **Admin Panel** window gets opens in the **admin panel** Window there is one menu bar and short details about what is on the website.
- There are four menus in the menubar of the **Admin Panel** window **Add Books, Messages, Users, and logout.**

Users(Staff) Login-

- Users will log in to the website by entering their particular email id and password.
- Then the **Home page of the website** window gets open where he can see the **description of books, add books to the cart, purchase the books, order history, print the order invoice, and log out.**

MenuBar

Admin

ADD BOOKS

When you click on add books on the menubar, a web form page gets open to adding new books to the website.

Here you can give the Books name, Author name, Price, category, book description, and choose an image of the book which will be displayed on the website, and when you click on the add book the book will be live on the website.

After uploading a new book to the website admin can edit the informations and also can delete the book.

User Detail

When admin clicks on the user detail in the menu the information about the user section gets open where he can update & Delete the particular user.

Messages

When admin clicks on the message in the menu a section gets open where the queries ask by the users are listed there.

User

Home

When a user login to the website he get redirected to the home page where he can see the lots of books listed according to category.

Cart

When a user like the book and he wants to buy it he can click on the shopping cart icon on the home page or on the books details page when he clicks on that the particular book added to his cart. In the cart page if users want to buy the book he can click on the Checkout Now button then he will redirected to the checkout page where he has to fill the a small details form and choose a payment method then click on buy now button then books will be ordered.

Orders

When user click on the order in menu page the order history page gets open where all the details of the all orders displayed and user can print the invoice of all the particular order.

TABLES

Users Table

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra

USER SCREEN LAYOUTS

User Home Page with category wise section

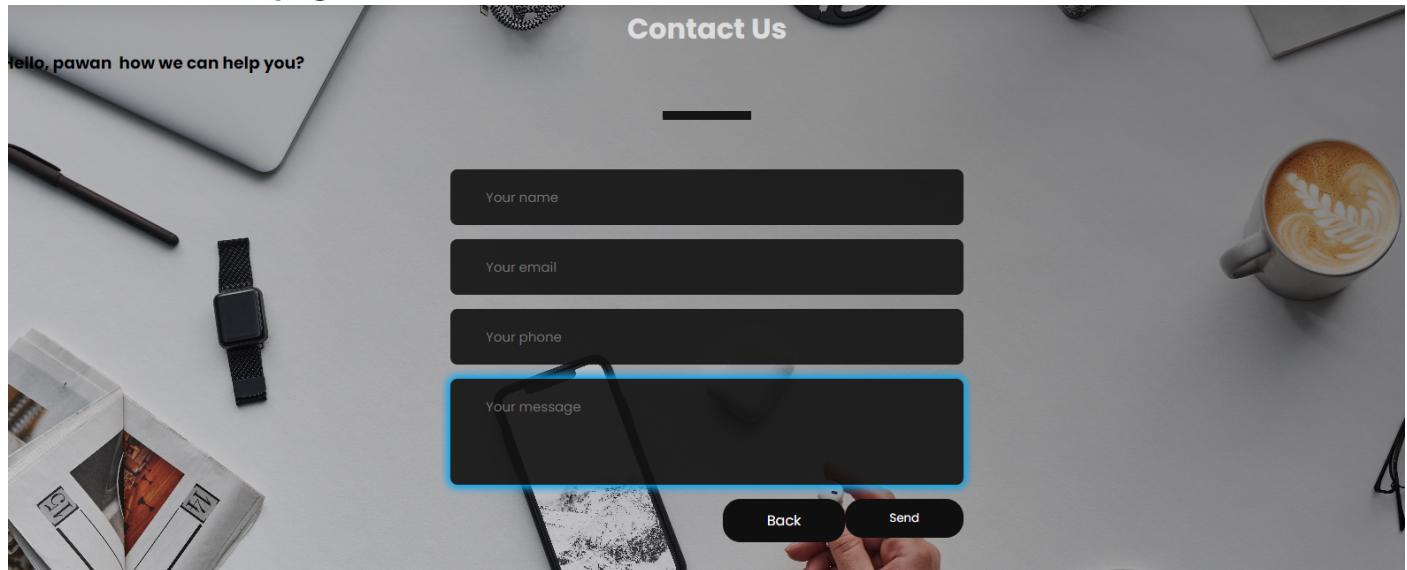

The screenshot shows the homepage of a book store named "Bookflix & Chill". At the top, there's a banner featuring a close-up of a lit candle on a table with some books. Below the banner is a navigation bar with links for Home, Category, Contact US, Cart, and Orders. To the right of the navigation bar are three buttons: a magnifying glass icon for search, "Login", and "Register". The main content area is titled "New Arrived" in blue text. It displays a grid of four books in the top row and two more partially visible in the bottom row. Each book card includes the book's cover, the author's name, the book's title, its price (e.g., ₹ 499/-), a "Know More" button, and a shopping cart icon.

Book Title	Author	Price	Action
Last Blood	ALEXANDRA GREGG	₹ 499/-	Know More
Batman Knight		₹ 789/-	Know More
Sunrise		₹ 800/-	Know More
Seventh Sun	LANI FORBES	₹ 560/-	Know More
Loveboat,			
ADRIENNE YOUNG			
Raybearer			
The Tawnter			

Single Book Details Page

The screenshot shows the details page for the book "The Seventh Sun" by Lani Forbes. On the left, there's a large image of the book cover, which features a golden sun-like emblem with the text "THE SEVENTH SUN" and "LANI FORBES". To the right of the image, the author's name "Author: Lani Forbes" is listed, followed by the book's name "Name: Seventh Sun" in bold. Below that is the price "Price: ₹ 560/-". There's a quantity input field set to "1" and a "Add To Cart" button with a shopping cart icon. Under the heading "Book Details", there's a brief description: "The terrible Asuras are pretty notorious. These demons have decided to spread chaos across the world and win over heaven. Here comes an Asura trying to kidnap mother Earth".

Users Details Page

The screenshot shows a web application interface for managing users. At the top, there's a header with the title "Bookflix & Chill" and a "Home" link. Below the header, a navigation bar includes links for "Add Books", "Orders", "Message", and "Users". On the right side of the header, it says "Hello pawan" and "logout". Under the "Users" link, there are three separate boxes, each representing a user profile. Each profile contains the user ID, name, email ID, password, and user type. Below each profile are two buttons: "Update" and "Delete".

User ID	Name	Email ID	Password	User type	Action
51	Pawan Pawan	Pawan@gmail.com	12345678	User	Update Delete
52	Pawan!!! Pawan!!!	Pawan@gmail.com	12345678	Admin	Update Delete
53	Pawan Pawan	Pawan@gmail.com	12345678	Admin	Update Delete

User Update Page

The screenshot shows a "User Update Page". It features five input fields: the first four are text fields containing "pawan", "pawan", "pawan@gmail.com", and "....." respectively; the fifth is a dropdown menu set to "User". Below the inputs are two buttons: a yellow "Update" button and a red "Cancel" button.
